

Setting the Standard

Quantum specializes in developing innovative Business Solutions for the Ocean Transportation & Logistics industry, using the latest technology and integration with proven value adding products. We create value through our clients' profitability, significant user satisfaction, organization and enterprise efficiency.

Quantum's competitive advantage is our partnership model that extends to our clients domain knowledge, people, products, and cost of ownership.

"We have engaged with Quantum due to the uniqueness of their offering especially Business Intelligence. Further we have found that their process maturity and compliance is to the highest industry norms that mitigates our risks"

Hrushikesh Joshi

Group CIO,

Allcargo Global / ECU Line

"Quantum has proven exceptionally well organized and professional by emphatically and proactively gaining understanding of our unique business niche and proactively proposing sustainable solutions thereby adding value and speed to the entire process "

Claus Bech

Line Manager, Shipcraft A/S

"There aren't many companies with such industry knowledge or power of innovation to create pre-configured applications as Quantum has done."

Mats Gullberg

Director OEM Channel, QlikView

"Quantum has demonstrated exceptional ability and qualification to create their solution portfolio, which is second to none.

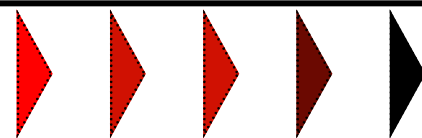

Dr. Anthony Grey
